Rob:

The Low Flow sampling event is targeting for the week of 7/30. We are currently tracking flows/weather and the long-term forecast is encouraging. This is approximately a 3 day field effort.

CWCM Event #5 was scheduled for next week, but was canceled due to low flows. It has not been rescheduled because the flows are currently under the acceptable threshold (< 400 cfs). Hopefully there will be some precipitation after the Low Flow sampling event so we can schedule for August.

Doug
